

Analyst – (U)HPLC Large Molecules - JOB042

Job description

Quality Assistance works on innovative medicinal products under development (preclinical and clinical phases). The projects are on the development, validation and/or application of analytical methods for the characterisation and quality control of (bio)molecules. Working in a team involved in projects outsourced by our clients, as an Analyst, you will validate and apply analytical methods, based on a protocol. You will also process data and write reports and associated supporting documents.

The analytical techniques used are liquid chromatography coupled to all types of detector (UV, DAD, fluorescence, RI, CAD) and liquid chromatography applied to biomolecules (SEC, IEX, etc).

Depending on your skills and ambitions, progression in the job is possible.

Education

Master in Chemistry / Biochemistry, specialisation analytics.

Skills

Technical skills

Required

Very good theoretical knowledge and practical experience of **HPLC - Waters Alliance, Bioalliance**.

Good theoretical knowledge and practical experience of **UPLC - Acquity, H-Class, I-Class**.

Pluses

Good knowledge of **capillary electrophoresis on macromolecules** (cSDS-PAGE, ICIEF).

General skills

Pluses

Knowledge of the pharmaceutical sector and GMP quality norms.

Language skills

Required

In addition to proficiency in French, notions of English.

Experience

Required

At least 1 year practical experience in application of analytical methods in aforementioned techniques.
