

ALLNEX IS RECRUITING FOR IMMEDIATE HIRING IN HIS DROGENBOS SITE

Job Description: Junior Synthesis Lab Technician

Position overview

Are you passionate about working in a laboratory environment for the synthesis of polymers and material characterization? We are looking for a Junior Synthesis Lab Technician to execute syntheses of sustainable waterborne and/or radiation curable polymers in the frame of development projects and manufacturing support. If you are an individual who thrives on making an impact in the coating business and wants to become a part of a dynamic team in a global company, we would like to hear from you !

Responsibilities

- Preparation of synthesis recipes according to discussed guidelines
- Execution of syntheses with in-process parameters control for diverse product families
- Autonomous work organization and priority setting within defined objectives & deadlines
- Final product characterization according to specific test methods
- Experimental design and data reporting
- Analysis requests and follow up
- Writing & presentation of up-scaling reports with follow-up of pilot batches
- Maintenance of lab synthesis equipment and work stations
- Compliance with good laboratory practices and behavioral based safety
- Stock control for raw materials and sampling requests for finished products
- Adherence to quality, safety & environmental ISO procedures
- Active participation to specific job-related internal and/or external meetings

Required skills and experience

- Creative personality with good chemical agility, structured mindset and engaged for driving results
- Interest in working in a lab environment implying hands-on-the-job realizations and problem-solving
- Multi-lingual practice (NL/FR/EN) with demonstrated team spirit and excellent communication skills
- Strong dedication to safety and quality standards

Qualifications

- Bachelor's degree in chemistry with preferred orientation in polymer science or industrial chemistry

Our offer

We are proud to offer a competitive salary package in an international working environment with great opportunities to develop your career. We are a truly innovative company engaged in green chemistry – with a strong team spirit and openness to new ideas. Allnex is a global leader in polymers and additives for industrial coatings and innovates consistently on sustainable products for tomorrow. Please read us on www.allnex.com.
